Factors Involved in Price Planning (Section 25 in your text – Marketing Essentials).

Legal & Ethical Considerations for Pricing --- Give the definition of the following – in **YOUR OWN WORDS**.

- Price Fixing **When competitors agree to set the same price for a product or service instead of allowing competition to determine pricing. Illegal since it eliminates fair market pricing.**
- Price Discrimination **When a business charges different prices for the same product to different customers without a valid reason, such as quantity discount. It is illegal under the Robinson-Patman Act if it harms competition.**
- Resale Price Maintenance **Occurs when manufacturers try to control the price at which retailers sell their products. While manufacturers can suggest prices, forcing a retailer to follow them is generally illegal**
- Unfair Trade Practices Law **Prevent businesses from using unethical or deceptive pricing strategies, such as false advertising or predatory pricing, to hurt competition**
- Price Advertising **This refers to how businesses promote their prices. The FTC regulates this prevent misleading or deceptive pricing claims**
- Pricing ethics **Setting prices fairly and honestly, without taking advantage of customers, competitors, or suppliers. Ethical pricing ensures transparency and builds consumer trust.**

Wanted Poster

1. Select one of the government regulations affecting prices. List here: **Pricing**
2. Identify and explain the law(s) connected to the government regulation. **The Sherman Antitrust Act prohibits businesses from conspiring to fix prices, restrict competition, or create monopolies. Price fixing is illegal because it reduces market competition and can lead to higher prices for consumers** **If you get more information from another source – add the URL.**
3. Develop a wanted poster for those who break the law (containing the info from 1&2). *You may choose to do this in another program – Paint, Canva, ??* *If you do this, do a screen print **and paste a copy below:***
